

Come In and See This New Machine

“Why, it will almost go in my knitting bag!”

Just think of it—a complete, full sized electric sewing machine so compact, so light that you can carry it in one hand upstairs, or down, to your neighbor's, or to the war-relief work rooms. When your work is finished, you put the machine out of the way on a closet shelf.

The electric motor does the hard work—relieves you of the tire of pedaling—and runs for three hours on one cent's worth of electricity.

You'll so enjoy sewing with this machine, and you'll find that you get so much more sewing done, that you'll economize as thousands of other women are doing in these war-times, by making your own and your children's clothes.

This new kind of a machine costs only \$37.50 (\$39.50 West of the Rockies)—less than most of the well-known makes of the old fashioned foot-power machines.
